Music Therapy 2022-2023

Music activates, inspires and stimulates emotional expression. Music relaxes, calms the nervous system and helps restore internal balance. Music moves us to do more and be more.

MUSIC THERAPY is an evidence-based clinical discipline where music is used to effect positive change and foster creative expression in children and adults. In addition to achieving clinical goals and improving social functioning of those with different abilities, Music Therapy provides people with opportunities to expand their lives and explore issues through creative expression.

Whether working one-on-one or in a group setting, BKCM offers music therapy for clients to grow through the transformative experience of making music within a therapeutic relationship. Our credentialed music therapists play music with clients using a variety of instruments through improvisation and specific music interventions to address client needs and goals.

Learn more about our Music Therapy program at BKCM and our outreach programs at schools and agencies throughout Brooklyn, Manhattan, Queens and Staten Island by visiting BKCM.ORG/MUSIC THERAPY

“Over four years, BKCM’s Music Therapy program has contributed to my son’s significant improvements in speech, social skills, direction-following and overall confidence. He’s also developed friendships with the other students in his class, whom he cheerfully greets with a ‘hello’ and a smile every week.”

– PETER HEROLD, father of Music Therapy client
All music therapy sessions at BKCM are registered by semester and run for 15 weeks. Sessions are scheduled on an individual basis to best meet the needs of clients and their families. Clients may register up to 10 weeks into a semester and pay a prorated tuition based upon the remaining weeks in the semester.
